WORK EXPERIENCE

One Data & Gen-AI Intern

Feb 2024 - July 2024

Genpact

Hyderabad, Telangana

- Contributed to the YODA project by developing ETL pipelines and optimizing data flows, resulting in a 30% improvement in processing speed.
- Completed a 2-month intensive Skydive program, gaining expertise in data engineering and machine learning.
- Designed and implemented a financial transaction fraud detection platform, reducing false positives by 15%.
- Developed a document question-answering system integrating text and images, improving query response accuracy by 25%.
- Created an AI-powered customer support agent, automating 60% of routine inquiries and enhancing user satisfaction.

TECHNICAL SKILLS

- Programming Languages:** Python, Core Java, C
- Database Management:** MySQL, SQL, MongoDB, PostgreSQL
- Data Science & Analytics:** Excel, Tableau, Tableau Prep, R, Web Scraping, Machine Learning, Deep Learning, Neural Networks, Computer Vision
- Generative AI Technologies:** Langchain, LlamaIndex, Milvus, ChromaDB, RAG, AI Agents, OpenAI
- DevOps & Cloud Tools:** Git, Jenkins, Ansible, Docker, Docker Compose, Kubernetes, Prometheus, Grafana, AWS, Azure
- Messaging Systems:** Redis, Kafka
- Multiagentic Frameworks:** Autogen, Crewai
- Code Quality & Security:** SonarQube

SCHOLASTIC ACHIEVEMENTS

Best Problem Solver — INeuron Online Hackathon	Nov 2022
5-Star Rating in SQL — HackerRank	Feb 2021 - Apr 2021
5-Star Rating in Problem-Solving — HackerRank	Jun 2021 - Aug 2021

CERTIFICATIONS

Gen AI COE Training — Genpact	Aug 2024
Skydive Training Program — Association of Data Scientists (ADaSci) and AIM	Jul 2024
Google Data Analytics Certificate — Coursera	Jan 2023
Python Complete Course for Python Beginners — Udemy	Mar 2023

PROJECTS

Autonomous Multi-Agent Development System

Aug 2024 - Present

- Designed and developed an advanced multi-agent system with autonomous code browsing, writing, and execution capabilities, streamlining project management and reducing manual intervention by 50%.
- Enabled dynamic code integration and real-time user input, optimizing workflows and reducing development time by 20%.

Smart IoT Monitoring and Analytics Platform

Aug 2024 - Present

- Developed a scalable IoT platform integrating Prometheus, Grafana, Docker, Redis, PostgreSQL, SonarQube, and Jenkins, resulting in a 30% reduction in system downtime and 25% improvement in monitoring efficiency.
- Implemented CI/CD pipelines, reducing deployment times by 30% and enhancing system reliability by 40%.

- Utilized Grafana for interactive data visualization and Prometheus for time-series data collection, improving data processing speed by 25%.

DocQA System

Jun 2024 - Jul 2024

- Engineered an AI-driven system for accurate extraction of information from PDFs and images, reducing query response times by 35%.
- Incorporated state-of-the-art NLP techniques to improve document understanding and context comprehension.

Traffic Monitoring and Car Detection System

Apr 2023 - May 2023

- Developed a car detection system using YOLOv8n and SORT algorithm, improving vehicle tracking accuracy by 20% and reducing false detection rates by 15%.
- Optimized image processing workflows using OpenCV, enhancing overall system performance by 25%.

Robust Traffic Sign Recognition System

Feb 2023 - Mar 2023

- Created a traffic sign recognition system using CNNs and data augmentation techniques, achieving a 95% accuracy rate in sign classification.
- Enhanced system reliability through advanced image preprocessing and model optimization strategies.

Hospital Management System

May 2022 - Nov 2022

- Designed and implemented a hospital management system with a CI/CD pipeline and Kubernetes deployment, improving system scalability and maintenance by 30%.
- Integrated real-time monitoring using Prometheus and Grafana, enhancing system observability and performance metrics.

US House Price Prediction System

Aug 2021 - Nov 2021

- Developed a house price prediction model using Flask and Scikit-Learn, achieving an 85% prediction accuracy and providing an API for seamless integration.
- Optimized data processing workflows with Pandas and NumPy, improving model performance and response times.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering	2020 - 2024
<i>Lovely Professional University</i>	<i>Punjab, India</i>
Intermediate (Class XII)	2018 - 2020
<i>Sri Chaitanya Junior College</i>	<i>Vijayawada, India</i>
Secondary School (Class X)	2016 - 2018
<i>Sri Chaitanya High School</i>	<i>Vijayawada, India</i>
